AVG Anti-Virus

AVG Anti-Virus plus Firewall

Complete Protection Against Viruses and Intrusion Attack

With computer viruses, trojan horses, worms, and other forms of random, malicious programs becoming more prevalent, the risk to your computer is amplified. Estimates of the damage caused each year by malicious programs run as high as \$55 billion. In addition, computers that are not protected by a firewall are easy targets for computer hackers and all types of data thieves. To protect themselves, tens of millions of users rely on Grisoft and its award-winning line of AVG Anti-Virus software – and you can, too, for antivirus and firewall protection.

A SOLUTION THAT'S JUST RIGHT FOR YOUR NEEDS

AVG Anti-Virus plus Firewall combines comprehensive AVG Anti-Virus protection with integrated Firewall protection against unauthorised access to your computer from internal and external networks.

AVG Anti-Virus plus Firewall provides all of Grisoft's advanced virus detection methods and components, including heuristic analysis, generic detection, scanning, and integrity checking. The sophisticated AVG Anti-Virus testing engine at the heart of the solution uses an extensive preprocessing procedure to proactively scan data for patterns of virus code, which it disarms by rendering the code in its basic form.

AVG Resident Shield does not allow you to open infected files and offers actions available to remove the virus

AVG Anti-Virus also allows you to check your computer for viruses on-demand, using predefined tests or creating your own tests and settings. You can launch the tests manually or schedule them to run automatically.

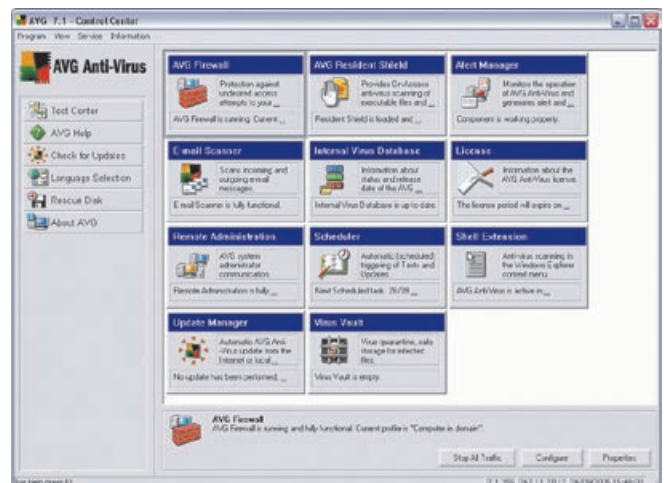

AVG FIREWALL

AVG Firewall is an integral part of AVG Anti-Virus plus Firewall and is accessible via the AVG Control Center. Safeguarding the

computer on which it is installed, AVG Firewall helps maintain your privacy and protects personally identifiable information from being sent from your computer without your permission.

AVG Firewall protects against external threats by hiding your computer from hackers and also protects against Trojan horses and Malware that tries to collect data and send it back to its creator. It also controls how your computer exchanges data with other computers on the Internet or a local network.

AVG Firewall controls traffic on network ports by assigning rules to the applications communicating over the network by allowing/blocking traffic accordingly or prompting you about what should be done in certain situations. AVG Firewall will also ask you to permit or deny communication for any new application, then create a new application rule based on your decision. When no user is logged on, queries are automatically suppressed and actions blocked for maximum protection.

AVG Control Center - easy access to the main AVG components, including AVG Firewall

AVG ANTI-VIRUS PLUS FIREWALL FEATURES

- 2-year licence
- 24/7 technical support via e-mail
- Easy to use
- Automatic high-speed updates via professional downloading services; plus the ability to update on demand or based on a schedule created by you

- Small update files (typically, tens of KBs)
- Rarely a need to restart the computer after updates
- Automatic scanning of files daily according to a customised schedule created by you
- Proxy server authentication support
- Firewall configuration via an easy-to-handle dialog environment, with basic and advanced options to support all levels of expertise
- Firewall event logging
- Low demand on system resources maximises performance
- Detection of Potentially Unwanted Programs
- Support for screen reader applications for the visually impaired

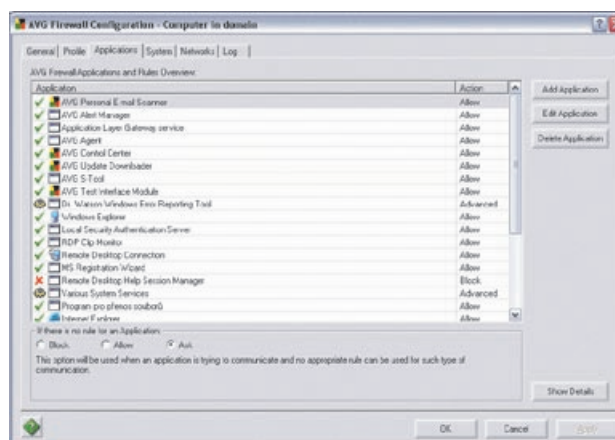

SUPPORTED PLATFORMS

- Windows 98
- Windows Me
- Windows NT
- Windows 2000
- Windows XP
- Windows XP 64-bit

AVG ANTI-VIRUS PLUS FIREWALL COMPONENTS

- AVG Resident Shield (On-Access Scanner) – for continuous, transparent antivirus file checking as files are opened, executed or copied/saved
- AVG E-mail Scanner – to guard against viruses from incoming e-mail and certify outgoing e-mail as virus-free
- AVG Virus Vault – to isolate and secure infected or suspicious files
- AVG Control Center – to access information about the status of the AVG components and modify settings as needed
- AVG Scheduler – to schedule tests and updates according to your needs
- AVG Update Manager – to access and modify the update settings

- AVG Test Center – to manually start tests, or create/modify your own tests
- Configuration Wizard – to help define the application rules to be used by the firewall

AVG Firewall Configuration Interface

TECHNICAL SUPPORT

With AVG Anti-Virus plus Firewall, telephone technical support from AVG UK is available weekdays 08:30–17:00. Additional technical support from Grisoft is available 24 hours a day, 7 days a week, via e-mail. Technical support staff provide expert consultation with rapid response times. AVG Authorised Resellers are also available to assist you with sales and technical questions. Registration of your AVG Anti-Virus Sales or License Number is necessary to receive technical support by e-mail (for user identification in the Grisoft database).
